## PROJECTS

### FIX ZONE ([HTTPS://ELECTRONICS-REPAIR-SERVICES.WEB.APP/](https://electronics-repair-services.web.app/))

React.js, Node.js, Express.js, MongoDB, Firebase authentication, Bootstrap these were used to build this website. Here this website is electronics repairing site. Users can fix an appointment for repairing their devices and they can also give reviews about their services. Here also tow types of users logged in this site. These are users who get this service and give reviews; other is Admin, who can edit /add/delete service.

### BD RIDES & TRANSPORT ([HTTPS://BD-RIDES-AND-TRANSPORTATION.WEB.APP/](https://bd-rides-and-transportation.web.app/))

I designed multi-logging system like email & password authentication, Facebook, Google. new user must be logged in if user want to use this service. Here I used React.js, Node.js, Express.js, MongoDB, Firebase authentication, Bootstrap to build this website

### BIG BAZAR ([HTTPS://BIG-BAZAR-SUPER-SHOP.WEB.APP/](https://big-bazar-super-shop.web.app/))

I used to React.js, Node.js, Express.js, MongoDB, Firebase authentication, Bootstrap to build this website. This is an e-commerce website; where users can buy their daily necessary things. Also, users can see their previous order. Here Admin can delete or add products.
